

HARDWARE COLLECTION · PULLS, KNOBS & DOOR HARDWARE

2026 COLLECTION

**TURNKEY**  
GLOBAL MATERIALS

Solid brass cabinet hardware and door sets, machined and finished for daily use. Knurled, linear, hammered and plain, in nine standard finishes.

Curated by Turnkey Global Materials: cabinet pulls and knobs paired with matching lever sets, knobs, pocket hardware and hinges for a single coherent hardware package.

## Hardware that *finishes the room*

Cabinet pulls and door hardware are the parts of a room a hand actually touches. This collection is solid brass throughout: knurled and linear bar pulls, hammered and plain knobs, and matching lever door sets, all machined to close tolerance and finished in nine standard colors from polished gold to matte black.

We grouped the range the way it ships: four cabinet collections plus a stone and specialty knob line, then the door side, lever handles on rosettes, knobs, pocket and flush hardware, entry bar pulls, and the concealed hinges and stops that finish the job. Every model code, size and center-to-center measurement here is pulled directly from the manufacturer's technical drawings.

### SOLID BRASS CONSTRUCTION

Every pull, knob and lever body is solid brass, not a plated zinc substitute, so finishes wear the way brass should.

### NINE STANDARD FINISHES

Matt brass, brushed brass, unlacquered brass, brushed nickel, antique brass, matt black, polished gold, gunmetal and matt white.

### ONE COORDINATED SYSTEM

Cabinet pulls, door levers, knobs and hinges share a finish palette, so a single order dresses an entire house.

SECTION 01

Cabinet *pulls & knobs*

Four collections in solid brass: knurled, linear, hammered and plain, plus a line of stone and specialty knobs.

## Knurled collection *bar pulls & knobs*

The knurled texture is cut directly into the brass bar, not applied as a coating, so it keeps its grip and its look for the life of the hardware. Bar pulls run from a compact 96mm center-to-center up to 320mm for larger drawer fronts; matching round and T-bar knobs finish smaller doors.

## Linear collection *straight bar pulls*

Where the knurled line adds texture, the linear collection keeps a clean turned cylinder, brass throughout, for a quieter read on a shaker or slab front. The CH012 bar pull spans eight lengths, from a stubby 64mm pull to a 320mm handle for wide pantry doors.

### A COMPANION TURNED FAMILY CH010, BRASS WITH BRUSHED NICKEL ACCENT

## Hammered collection *hand-forged texture*

A hand-hammered face brings an artisan surface to the same brass hardware platform. The half-moon knob and ball knob read as jewelry on a door; the full-length bar pull carries the texture the entire run in polished gold.

### BAR PULL & KNOBS CH013H · CH014H · CH018H

CH028-ZG-25 / 28

25mm sphere or 28mm sphere, polished gold

### IN PLACE

#### HAND-FINISHED, PIECE BY PIECE

Each face is struck by hand, so no two knobs carry an identical hammer pattern; the texture is a finishing step, not a stamped-in effect.

#### POLISHED GOLD AS STANDARD

The hammered line ships in polished gold across the range; other finishes are available on request for larger orders.

#### PAIRS WITH PLAIN ROSETTES

Because the texture carries the visual weight, we usually specify hammered pulls against a plain cabinet front and plain door hardware.

## Plain collection *essential turned hardware*

No texture, no ornament, just a clean turned brass profile in a full range of pulls, knobs and door furniture. This is the collection to specify when the room calls for the hardware to disappear.

| CH057 | 25mm or 35mm diameter, knurled rim |

### IN PLACE

## Stone & specialty knobs *one-of-a-kind faces*

Each stone knob is cut from natural agate, quartz or howlite, so grain and color vary piece to piece the same way they would in a slab countertop. Brass hardware in the same finish family (hexagon, flower and sphere) rounds out the specialty line for a mixed-material kitchen.

### FACETED STONE CH003 & ROUND STONE CH005

**CH051**

30mm flower

SECTION 02

Door *hardware*

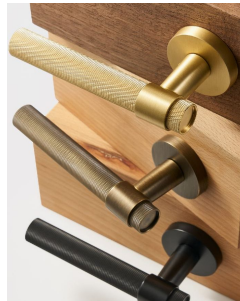

Lever handles, knobs, pocket and entry hardware and the hinges and stops that finish the opening, in the same nine-finish palette as the cabinet line.

## Knurled lever handles *A52-01 · A52-02 · A52-03*

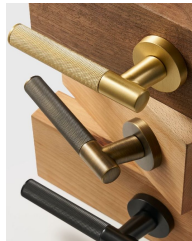

Three lever profiles share the same knurled brass grip on a 25mm rose: A52-01 is a straight bar, A52-02 turns the grip on end for a T-handle read, and A52-03 fits a fluted variant of the same bar. Each ships in passage, privacy or keyed mortise function.

### A52-01 STRAIGHT LEVER

| CENTRE DISTANCE | 38mm                                                                 |
| FUNCTION CODES  | PA passage · PR privacy · Key exterior mortise · BK interior mortise |
| FINISHES        | Matt brass · antique brass · matt black · brushed nickel             |

#### SOLID BRASS ROSE & BAR

Not plated zinc. The knurl is machined into the bar itself, so the grip and the finish both hold up to daily use.

#### ONE ROSE, FIVE FUNCTIONS

The same 52mm rose accepts passage, privacy, keyed exterior and interior mortise inserts, so a hallway and a bedroom can share hardware.

#### MATCHED TO THE CABINET LINE

The same knurl pitch and the same nine finishes run through the cabinet pulls, so a kitchen and its doors read as one order.

## Linear, plain & sculpted levers A52-04 · A52-05 · A52-08 · A52-11

A flat oval bar (A52-04), a plain turned cylinder (A52-05), a ringed traditional profile (B52-08) and a tapered sculptural lever (A52-11) round out the door lever range, so a single house can mix a knurled kitchen pull with a plain bedroom lever from one finish family.

A52-04  
Flat oval · 134mm

A52-05  
Turned · 134mm

B52-08  
Ringed · 137mm

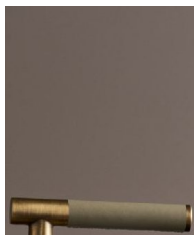

A52-11  
Tapered · 142mm

## Pocket, flush & sliding door hardware *SD01* · *SA52-01* · *TA52-01*

Flush pulls (SD01) sit recessed in the door face for pocket and sliding applications; the SA52-01 pull and mortise adds a knurled grip and a hook-bolt lock for a sliding barn door. TA52-01 is the matching tubular privacy latch with a knurled thumb-turn.

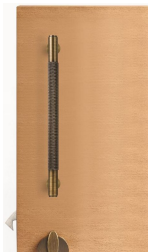

### FLUSH PULL SD01 PASSAGE 500G · PRIVACY 800G, DOORS 40 TO 58MM

## Entry & appliance bar pulls *DP01 · DP04 · DP05 · DP08 · DP81*

Long-format bar pulls for entry doors, oversized appliances and heavy sliding panels. All seven profiles share the same mounting centers across three lengths, from a 300mm minimum up to a 600mm reach, so entry doors and a full-height refrigerator panel can share one hardware family.

**DP01**

### 600MM REACH

C 534-570mm, L 600mm, 1546g to 3800g

### BAR DIAMETER

53 to 55mm, single or double-post mounting (A / B)

### TWO MORE PROFILES DP11 TURNED FINIAL · DP16 KNURLED WITH BRASS CAP

#### ONE FAMILY, THREE LENGTHS

300, 450 and 600mm centers cover a single entry door leaf up to a full-height panel, so a builder can spec one pull family for the whole exterior.

#### SINGLE OR DOUBLE POST

Every profile mounts on either a single center post (A) or two end posts (B), matched to the door or panel thickness on site.

#### MATCHES THE INTERIOR LINE

The same knurl, hammer and turned-wood textures used on the cabinet pulls carry through here, so exterior and interior hardware read as one order.

## Hinges, locks & door stops

The hardware that never gets seen but always gets used: a concealed three-way adjustable hinge for flush doors, a standard ball-bearing butt hinge, tubular latches in passage, privacy and deadbolt function, and a knurled floor door stop in four finishes.

### CONCEALED HINGE H60

### H60 IN SIX FINISHES GOLD · ANTIQUE BRASS · MATT BLACK · WHITE · GREY · BRUSHED NICKEL

## Finishes & code interpretation

Nine standard finishes run across the entire hardware line, cabinet and door alike, so pulls, levers, knobs and hinges from the same order always match. Every product code carries the finish abbreviation shown here, plus a rose-plate size and a structure code for the door function (passage, privacy or mortise lock).

### STANDARD FINISHES SOLID BRASS BASE METAL, PLATED OR BRUSHED AS NOTED
